

DISCOVER THE
GREENSTAR LIFE RANGE

DESIGNED FOR MODERN LIFE

After 50 years of award winning innovation, our new Greenstar Life range makes looking after the heating and hot water in your home easy. It not only features a modern new design but it's also part of our most powerful wall hung combi-boiler range, with increased power outputs of up to 50kW.

GIVING YOU MORE CONTROL

It's the little touches that make all the difference, so we've upgraded the controls and connectivity throughout the Life range. We have improved the boiler's display screen and created easier-to-use push control buttons, whilst making the Life range wirelessly compatible with the Bosch EasyControl, meaning you have the power to control your heating and hot water wherever you are. All of these changes have been made to make your life easier, and improve your comfort.

INTELLIGENTLY WORKING TO MAKE YOUR LIFE EASIER

Life also features innovative new technology designed to keep your system pressure at its optimum level. Our unique optional Intelligent Filling System constantly monitors your boiler's pressure and will automatically adjust this if needed. This removes the need to manually top-up the system pressure, keeping your boiler working at its best when you need it most

QUIETLY WARMING YOUR HOME

The Life is the direct replacement for our multi award winning Greenstar CDi Classic. It has been redesigned, modernised and re-engineered to improve performance and maximise efficiency. It is also one of our quietest boilers yet, so you will never know it's there. For extra peace of mind we are also offering up to a **10 year guarantee*** on the Life range.

*Terms and conditions apply.

CONTROLS

The Greenstar Life range is compatible with a range of controls, offering you simple solutions to manage the heating and hot water to suit your home.

WIRELESS BOSCH EASYCONTROL

The wireless Bosch EasyControl is a smart internet-connected room thermostat that connects directly to your smartphone. It allows you to control your heating and hot water on-the-go.

GREENSTAR COMFORT + RANGE

The Greenstar Comfort is an intelligent programmer and a room thermostat allowing access to control functions from a single, easily accessible location.

THE BOILER, BUT NOT AS YOU KNOW IT
